

## PRESS RELEASE

Supporting the Government to Achieve New & Renewable Energy Mix in 2025

### **PLN and Total Eren - Adaro Power - PJBI Sign the Power Purchase Agreement for the 70 MW Tanah Laut Wind Project in Indonesia**

**Jakarta/Paris, May 4<sup>th</sup>, 2023** – PT Perusahaan Listrik Negara (Persero) (“PLN”) has signed a Power Purchase Agreement (“PPA”) with Total Eren S.A. (“Total Eren”), PT Adaro Power (“Adaro Power”), and PT Pembangkitan Jawa Bali Investasi (“PJBI”), which covers the construction of a 70 MW wind power plant equipped with a battery energy storage system of 10 MW / 10 MWh to be located in Tanah Laut, South Kalimantan.

The signing was held by Darmawan Prasodj, PLN’s President Director, Romain Pierru, Managing Director Indonesia & CFO APAC at Total Eren, accompanied by Gregory Thomassin, COO & Head of Project Finance APAC, Dharma Hutama Djojonegoro, Adaro Power’s President Director, Mustiko Bawono, Adaro Power’s Director, Kusmayanto Kadiman, Adaro Power’s Vice President Commissioner, Amir Faisal, PJBI’s Director accompanied by Ruly Firmansyah, President Director of PLN Nusantara Power, at PLN’s head office in Jakarta, on Thursday May 4<sup>th</sup>, 2023. The Tanah Laut wind power plant is expected to start supplying electricity in 2025 to support the Government’s renewable energy targets in Indonesia.

**Darmawan Prasodjo, PLN Persero’s President Director**, said: *“Going forward, this PPA for the Tanah Laut wind power plant is expected to serve as a reference for wind power plant projects in particular, and for new and renewable energy in general, not only in terms of the competitive price but also as being acceptable to Independent Power Producers (IPP), PLN and the banking sector. This wind power plant, with a capacity of 70 MW and a battery energy storage system (BESS) of 10 MWh, aims to strengthen the electricity supply in the Kalimantan interconnection system and add more renewable energy in the Indonesian mix.”*

**Garibaldi Thohir, Adaro’s President Director** stated: *“The PPA signing is a significant moment for Adaro as we look to build out the Adaro Green pillar. This is not only our first IPP wind project, but also the manifestation of our serious endeavor to continuously develop various reliable and affordable renewable energy sources. This is in line with the Government’s aspiration to ensure that the energy transition in Indonesia will produce affordable energy for all Indonesian people. We are delighted to have engaged into our partnership with Total Eren.”*

**Romain Pierru, Managing Director Indonesia & CFO APAC at Total Eren**, added: *“We are delighted to partner with PLN for the supply of electricity with the Tanah Laut Wind Farm, which demonstrates Total Eren’s strong commitment to the renewable energy market in Indonesia and strong ambitions in the country. Total Eren had initiated the development of this project and then been successfully awarded in a competitive tender together with our strategic partner Adaro Power. With the signing of this PPA, we are reaching a new milestone with our Partners. I am looking forward to the commencement of the construction of the Tanah Laut Wind Farm which will provide low-carbon electricity for the benefit of people in Indonesia.”*

The Tanah Laut wind power plant's construction phase is targeted to commence at the beginning of 2024 and projected to achieve commissioning in 2025. It is expected to strengthen the electricity supply in Kalimantan Interconnection System and add to the new and renewable energy mix in Indonesia. The 70 MW Tanah Laut wind farm will use the latest wind turbine technology with a capacity of above 6 MW/unit and equipped with a battery energy storage system (BESS) of 10 MW / 10MWh which will mitigate the wind farm's intermittency.

The Tanah Laut wind project's development has gone through a competitive process, out of which PLN appointed the Consortium of Total Eren and Adaro Power as the tender winner and signed the Letter of Intent (LoI) on November 15<sup>th</sup>, 2022 within the G20 event in Bali. To expand the company's portfolio, in particular in the renewable energy sector, PLN has assigned PJBI through PT PLN Nusantara Power (PNP) as PLN's subsidiary in the power generation segment to get involved in the development of the 70 MW Tanah Laut wind farm. The PPA signing today shows that Indonesia is a promising investment destination for renewable energy projects for overseas investors. In addition, the development of Tanah Laut wind power plant is also expected to be a reference for the future development of wind power plants and new and renewable energy projects for all parties, including the banking sector, sponsors, and PLN.

PLN, along with Total Eren, Adaro Power and PJBI, reaffirm that partnerships with various local and international partners are highly necessary to realize Indonesia's commitment to achieve the expected energy mix target through the acceleration of clean energy transition. Therefore, the realization of the Tanah Laut wind power plant is expected to support the achievement of the new and renewable energy mix target, and contribute to reduce CO<sub>2</sub> emission by 220,000 tons per year as well as achieving the national CO<sub>2</sub> emission reduction target of 34.8 percent.

### **About PLN**

PT PLN (Persero) is a state power company with the commitment and innovation to carry out its mission to lighten and power the nation. With the vision to be the leading electricity company in Southeast Asia, PLN strives to be the #1 customer choice for energy solutions. PLN champions the transformation agenda with the aspiration to be Green, Lean, Innovative, and Customer-Focused to supply power for a better life. PLN can be reached through PLN Mobile app available at PlayStore and AppStore.

### **About Adaro**

PT Adaro Energy Indonesia Tbk is a vertically integrated energy company in Indonesia with businesses in the sectors of coal mining and services, minerals and minerals processing, renewable energy, utilities and supporting infrastructure. In 2022, Adaro started its transformation to operate under three business pillars: Adaro Energy – leading all businesses that have developed the Adaro Group into one of the largest energy companies, Adaro Minerals – preparing to manage mineral resources and aluminum businesses in the green industrial park in Kalimantan, and Adaro Green – focusing on developing various new and renewable energy sources.

### **About Total Eren**

Founded in 2012 by Pâris Mouratoglou and David Corchia, Total Eren develops, finances, builds and operates renewable energy power plants (solar, wind, hydro) representing a gross capacity of more than 3,700 MW in operation or under construction worldwide. Through partnerships with local developers, Total Eren is currently developing numerous energy projects in countries and regions where renewable energy represents an economically viable response to growing energy demand such as in Europe, in Central and South Asia, in Asia Pacific, in Latin America and in Africa. Since December 2017, TotalEnergies, the major energy company, has been participating as a shareholder of Total Eren.

### **About PJBI**

PT PJB Investasi (PJBI) is a subsidiary of PT PLN Nusantara Power that focuses in power generation investments. In line with PLN's and Indonesian Government's transformations to optimize clean energy, PJBI takes part in upholding the vision of green energy utilization for Indonesia's power generation. PJBI has been collaborating with partners from various countries to build and manage IPPs, among which is the Cirata Floating Solar PV, the largest solar PV in Southeast Asia.
